## **DETAILED ACTION**

1. The finality of that action is withdrawn and request for reconsideration after-final has been entered.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-24 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 17 of copending Application No. 10/683,936. Although the conflicting claims are not identical, they are not patentably distinct from each other because metal seals are well known in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

4. Claims 1-4, 12-15, and 22-23 are rejected under 35 U.S.C. 102(e) as being anticipated by non-patent literature COOPER OIL TOOL, "Cadez Poseiden Field Development (dated 07/11/1994-05/26/1995). This reference shows, on pages 3-6 & 8, a flow completion system with a tubing hanger with a production bore, production passageway and outlet, and further showing first and second closure members (upper and lower wireline plugs; claims 3 and 13) and first and second steel (page 5; claims 2, 4 & 14-15) annular seals creating first and second pressure containing barriers (uppermost; claim 12) that isolate the production bore and tubing annulus from a portion of the bore. This reference also shows an annulus bore 18 (claim 10) above the second seal with a closure member 44 and a tree cap 42 (claim 3). As concerns the method claims 22-23, they are rejected as being inherent to the apparatus COOPER OIL TOOL as noted above

***Allowable Subject Matter***

5. Claims 5-11, 16-21, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and obviating any double patenting rejection.

***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
